fünfzig

452 = vierhundertzweiundfünfzig

Thousands and hundreds come first. The units-before-tens pattern applies inside the remaining two-digit block. Write ordinary whole numbers below a million as one word.

One changes with its job

1 → **eins** · 21 → **einundzwanzig** · 1,00 € → **ein** Euro · 1.000.000 → **eine** Million

Read a price tag

24,50 € → vierundzwanzig Euro fünfzig Cent

0,50 € → fünfzig Cent · 1,01 € → ein Euro ein Cent

The comma separates euros and cents. In a clear price context, vierundzwanzig fünfzig is also common.

Phone numbers keep their first zero

0176 → null · eins · sieben · sechs

Recall: cover the German column, say the number, then check. Compare 13/30, 16/60 and 17/70 using the listening activity.
